☞CANAL.—We understand that the water will be let off from the Canal on the 20th inst.

☞MAIL.—We had no mail from the east this morning.—We suppose there must be much snow on the mountains, and this has prevented, or delayed the passage of the stage. Our readers will be disappointed if they expect to find much news in our paper to day.

P. S. The mail arrived to day at about eleven o'clock, but brought nothing of interest, later than we had yesterday.

THE CAMPAIGN OPENED.—We notice, in the Cincinnati papers, of Friday, a call of a meeting of the friends of *John McLean*, for the next presidency, to be held on last Saturday evening, at the court house in that city. This call is signed by upwards of *two hundred persons.*

CANAL COMMISSIONERS' REPORT.—By this document we are reminded that the first law of this commonwealth, authorizing the making of canals and rail roads at the expense of the state, was passed on the 25th February, 1826, and the first ground was broken, near Harrisburgh, on the 4th of July of that year.

The report states that, on the opening of navigation in the spring, the following lengths of canal and rail road will be ready for use—viz:

| | |
|---|---|
| Railway from Philadelphia to Columbia, | 82 miles |
| Canal from Columbia to Hollidaysburg, | 171¾ |
| Portage Rail Road over the Allegheny mountain, | 36 |
| From Hollidaysburg to Conemaugh, | 104¼ |
| Distance from Phila. to Pittsburgh, | 394 miles |
| Canal from the mouth of Juniata to the mouth of Solomon's creek, on the north branch of the Susquehanna, | 96¾ |
| Canal from Northumberland to the head of the pool of the Muncy dam, on the west branch of the Susquehanna, | 26¼ |
| Canal from Bristol to Easton, on the Delaware, | 59¾ |
| Canal from the Ohio River up Big Beaver to Newcastle, | 24¾ |
| Canal from the mouth of French Creek at Franklin, to near the feeder aqueduct, in Crawford county, | 22¼ |
| The continuation of the Portage rail road along side the basins at Hollidaysburgh and Conemaugh, the Conemaugh feeder, the Allegheny town branch of the canal, the south fork and Raystown feeders, and the Lewisburg side cut together, | 8 |
| | 632 miles |

| | |
|---|---|
| The expenditures for repairs, in 1833, was | $275,383 52 |
| The total amount of tolls paid into the treasury, in 1830, was | $27,012 90 |
| " 1831, " | 38,241 20 |
| " 1832, " | 50,909 57 |
| " 1833, " | 151,419 19 |

The Commissioners calculate that the tolls for the ensuing year will fall little, if any, short of a *half a million of dollars.*

| | |
|---|---|
| The cost of the *Columbia Rail Road* when completed, and including $51,000 for locomotive engines, will be | $3,595,808 |
| The cost of a single track of the Allegheny Rail Road will be | $1,255,061 |
| The estimated cost of the second track, | 325,577 |
| Total cost of Portage Rail Road, | $1,620,907 |

The Commissioners next state that an important question will occur, as to the manner of using the rail roads, and submit the following methods for the consideration of the Legislature:

"1. To establish the rail roads as public high ways, for the use of every person who may choose to employ either horses or locomotive engines.

2. To prohibit the use of locomotive engines altogether, and make the roads public highways for the use of every person who will employ horses alone as the motive power.

3. To prohibit the use of horses altogether on such parts of the roads as can be advantageously traversed by locomotive engines, and make them public highways for the use of every person who will employ locomotive engines alone as the motive power.

In either of the three preceding cases, in which the rail roads would be declared public highways, the Commonwealth must maintain and employ the stationary steam engines and ropes at the inclined planes, or lease them for a term of years to individuals or companies.

4. To lease the roads and transportation to a company or companies, for a term of years, binding them to preserve the roads and machinery in good order.

5. To lease the transportation alone to a company or companies, for a term of years, and the Commonwealth to maintain the roads and machinery in repair.

6. To lease the right of *traction* or *motive power* only, to a company or companies, for a term of years, binding them to transport such cars with their freight as may be offered by individuals or companies, and the Commonwealth to maintain the roads and machinery in repair.

In either of the last three cases of leasing the *roads*, the *transportation*, or the *traction*, the stationary steam engines and ropes at the inclined planes, may be maintained and employed by the Commonwealth, or they may be let out on leases, for a term of years, to individuals or companies.

7. The Commonwealth to furnish the traction or motive power, own the cars, and do all the transportation on the rail road.

8. The Commonwealth to furnish the traction or motive power only, and transport such cars, with their freight, as may be offered by individuals or companies."

*The Beaver Division* is located from the mouth of Beaver, up that stream and the Shenango, a distance of 30 miles and 240 perches. It consists of 8 miles and 100 perches of canal, and 22 miles and 140 perches slack water, made by 7 dams.

☞PUBLIC NOTICE.

An adjourned meeting of the Pittsburgh Colonization Society, will be held in Dr. Herron's Church, on Monday evening, the 30th inst., at 6 o'clock. All persons friendly to that Institution, are respectfully invited to attend, and take a part in the election of officers for the ensuing year. Some interesting addresses may be expected on that occasion.

FROM ALABAMA.—*Owen's Case.*—We have been informed, on the authority of a letter from the seat of disturbance in Alabama, that Lieut. Manning, of the U. S. Army, who commanded a detachment of soldiers by whom Owens was shot, has given bond for his appearance at Court.—And that the soldier who committed the act, has deserted and fled the country.—*Charleston Mercury.*

*The Canal.*—Fourteen or fifteen boats have passed down the canal, loaded with Pot and Pearl Ashes, Staves, Potatoes, and other articles for the Pittsburgh market. The works on this section of the Pennsylvania canal, are pronounced by all who have had an opportunity of observation, not inferior to any in the State. We hope we shall ere long be permitted to hail the products of the lakes as they pass along this canal on their way to the Philadelphia market.—*Venango Democrat.*

We understand a meeting was held in Warren last week, upon the subject of the Allegheny river, that some spirited resolutions were passed, and a convention was recommended to be held at that place, on the subject, on the 24th of January next. We shall probably receive the proceedings soon, through the medium of the Warren paper, when we purpose publishing them.—*Venango Dem.*

CINCINNATI, Dec. 11.

There will be a M'Lean meeting on Saturday evening next. It is called by a large and influential portion of the Jackson party. C.Tatem and J. C. Goodloe are among the prominent and active ones. It is believed there will be quite a successful display of forces. The Van Buren men know not what to do. The RUMP call for a convention meets with little or no favor here. The denunciations of the Republican react with salutary effect. The Nationals say nothing against the M'Lean movement, but no prominent one has or will take part in it. The fence is a delightful place to sit upon these times: a body can look on the turmoils below them with the most delightful composure. Of one thing I feel convinced; and that is, the time has come when the office men can be overwhelmed with public sentiment. But to do this effectually, we must not comit ourselves to any men. It is really a matter of no consequence to the whole public who is a candidate for the Presidency, so that he is a sound man, in whose talents and integrity the public has confidence. It is of great concern to all, that the efforts of the office holders to control public opinion, should be defeated.—*Ohio State Journal.*

*In a Blaze of Glory.*—Why is the Bank of the United States an *unsafe* depository of the Government funds?

Because it has an "*unprecedented amount of specie in its vaults!*

How did the President *concur* with the Secretary in removing the deposits? By ordering it to be done himself, and kicking Mr. Duane out of office for refusing to obey him, and then appointing the *tool* who did obey his edict.

Why is the Manhattan bank a *safe* depository of the Government funds?

Because it is unable to meet its own engagements, and has to borrow from the Government by the half million at a time to sustain its credit.

Why is the Post Office Department in a flourishing and prosperous condition?

Because it is *only one million* behindhand when every body expected it would be *two?*—*Cin. Gaz.*

*Post office Department.*—It is estimated that this department of the government is *one million* of dollars in debt. Five years since, Judge McLean left the department with a surplus of about two hundred and forty thousand dollars. What has become of these funds, and to what end has the additional million been applied? We answer, to feed favorites, influence elections, corrupt the press, and to keep the reins of government in the hands of the Kitchen Cabinet and Martin Van Buren.—*Cin. Gaz.*

It is stated that the Legislature of Arkansas is about to enact a statute for the regulation of the press, which will provide, among other things, for *compelling* editors to give up the names of their correspondents.

The cholera still lingers in Paris; the symptoms are identical with those of the former epidemic, and the mortality full as great in proportion to the number of cases.

## REPORT OF THE POSTMASTER GENERAL.

GENERAL POST OFFICE DEPARTMENT,
*November 30th*, 1833.

*To the President af the United States:*

SIR—When, in 1829, the functions of this Department devolved upon me, the annual transportation of the mail amounted to 13,700,000. The contracts then in existence with the other expenses of the Department, had within the year ending the 30th June, 1829, diminished its surplus revenue $101, 256 03, and those contracts were still in force from one to four years in prospect.

| | |
|---|---|
| The surplus available revenue had been reduced to the nominal amount of | $230,849,07 |
| But it has subsequently been ascertained, that there had been expenses incurred for transportation performed prior to the 1st of July, 1829, which were not embraced in that account to the amount of | $64,248,76 |
| Which reduced the real surplus to | $166,600,31 |

The annual transportation of the mail was, on the 1st July 1833, 26,854,485 miles.

The annual amount of the transportation of the mail in stages and steamboats, on the 1st July, 1829, was 6,507,818 miles.

The annual amount of the transportations of the mail in stages and steamboats, on the 1st July, 1833, was 18,322,576 miles.

The expense of transporting the mail for the year ending 30th June, 1829, was $1,153,644,21.

The expense of transporting the mail for the year ending 30th June, 1833, was $1,894,688,08.

The gross amount of postages, constituting the revenues of the Department, was, for the year ending 30th June 1829, $1,707,418,42.

The gross amount of postages for the year ending 30th June, 1833, was $2,616,528,27.

The incidental expenses of the Department for the year ending 30th June, 1829, amounted to $69,249 08.

The incidental expenses of the Department for the year ending 30th June, 1833, amounted to $87,701,61.

The number of Post Offices in the U. States on the 1st July, 1829, was 8,004.

On the 1st July, 1832, the number of Post Offices in the U. States was 10,127.

The increase of the annual transportation of the mail within the four years ending the 30th June, 1833, is 13,154,485 miles nearly equal to the whole amount of transportation in 1829.

The increase of the annual amount of postages within the same period, is $909,119,85, and the whole amount is more than double of what it was in 1825.

The average expense of transporting the mail in 1829, was eight cents and four tenths of a cent per mile.

The average expense of transporting the mail in 1833, is seven cents and fifty seven hundredths of a cent per mile; making a difference in the rate per mile of eighty three hundredths of a cent, equal for the whole service to $222,892,22 per year less, in proportion to the service performed, than the expense of transportation in 1829, besides a great increase in expedition between the principal commercial cities, and a much greater proportion of the whole performed in stages,

After carrying into effect the law of the last Congress establishing new mail routs, the present length of mail roads in the U. States, amounts to 119,916 miles, viz:

| | Miles. | | Miles. |

The increase of transportation from the 1st July, 1832, to the Jst July, 1833, has been,

| | | |
|---|---|---|
| In stages, | 1,471,096 | miles. |

The method in which the accounts of the expenses of transporting the mail have always been kept in this department, has led to a misapprehension of the means of extending improvements in mail facilities. It appears, from the earliest records of the department, to have been a rule not to enter to the credit of a contractor, nor to charge to the account of transportation, the expense of carrying the mail on his rout, till after he had signed his contract and bond, and returned them to the department with proper security, though the service may have been regularly performed, and, in many instances, the moneys actually paid. It has sometimes happened that contracts of the greatest magnitude have, from various causes, remained for more than a year unreturned. In such cases, though the expenses have been incurred, they do not appear in the transportation account, and, though the moneys may have been paid to the contractors, they stand on the books as balances to that amount due from them to the department, constituting a part of its surplus fund; when, in fact, they constitute a part of the actual expense incurred for the transportation of the mail. The consequence has been, that the expenses for transporting the mail within any given period of time, as shown in the accounts, and reported annually, through the Executive, have been always calculated to exhibit an amount considerable less than what has actually been incurred. This is an imperfection not of recent origin, but one which appears to have been co-existent with the department. When the number of contracts was few, and the surplus revenue bore a large ratio to its whole annual amount, the effect was unimportant; but, in the increased number of mail routs, and the diminution of its surplus revenue, it was calculated to produce serious inconvenience. From the statements growing out of this system, thus illusory in their results, together with the great expense of carrying into effect the law of the last Congress, establishing new mail routs, and a disposition to gratify the wishes of the public in the improvement of the mail facilities, I was led to carry those improvements to an extent which it was found the resources of the department would not well sustain. When the inconvenience was felt, the cause was carefully investigated, and the following result was disclosed. Prompt directions were given for the correction of the error in future. It is not possible to determine, to an exact certainty, the whole expense incurred for transportation within any recent period, because it will often happen that improvements will become necessary, even for the fulfilment of existing laws, the expenses of which, for want of proper evidence, must be reserved for subsequent adjustment, and so come into the account for a later period than that in which the services were performed. But these variations are of an inconsiderable amount compared with the differences resulting from the system heretofore observed.

On the 30th of June, 1829, which was the close of the first quarter in which I had assumed the functions of the department, the expenses which had been incurred for the transporting the mail, were $64,248 76 more than the amount stated in my report to that day.

| | |
|---|---|
| On the 1st day of July, 1832, the day to which my last report reaches, there was stated to be a surplus of available funds, after defraying all the expenses of the department up to that day, of | $202,811 40 |
| It is however now ascertained, that the expenses incurred for transportation, which had actually been performed prior to the 1st of July, 1832, beyond the amount stated in that report, were | 205,656 07 |
| So that, instead of a surplus on that day, the department was actually indebted, on the 1st day of July, 1832, beyond the whole amount of its available funds, admitting that no losses of postages should be sustained, | 2,844 67 |
| The gross amount of postages for the year ending the 30th June, 1832, was | 2,258,570 17 |
| The gross amount of postages for the year ending the 30th of June, 1833, was | 2,616,538 27 |
| Making an increase for the year over the former year of | $357,968 10 |
| The net proceeds of postages, after deducting commissions to postmasters and the contingent expenses of their offices, for the year ending the 30th June 1832, was | $1,543,098 49 |
| For the year ending June 30, 1833, it was | 1,790,254 65 |
| Making an increase of net proceeds, for the year, of | $247,156 16 |

The expenses of the Department, incurred for the year ending June 30, 1833, were as follows, viz:

| | | |
|---|---|---|
| Compensation to postmasters, including the contingent expenses of their offices— | | |
| 3d quarter, 1832, | $202,431 26 | |
| 4th quarter, " | 200,151 51 | |
| 1st quarter, 1833, | 214,935 50 | |
| 2d quarter, " | 208,765 25 | |
| | | $826,283 62 |
| Transportation of the mail— | | |
| 3d quarter, 1832, | 435,892 95 | |
| 4th quarter, " | 441,183 01 | |
| 1st quarter, 1833, | 499,184 86 | |
| 2d quarter, " | 518,426 16 | |
| | | 1,894,688,08 |
| Incidental expenses for the year, | | 87,701 61 |
| Making together, | | $2,808,673 31 |

The gross amount of postages for the same period was—

| | | |
|---|---|---|
| 3d quarter, 1832, | 642,689 22 | |
| 4th quarter, " | 630,464 47 | |
| 1st quarter, 1833, | 673,957 67 | |
| 2d quarter, " | 669,426 91 | |
| | | 2,616,538 27 |
| Leaving a deficit of | | 192,135 04 |
| Add this sum paid into the Treasuary by irregular deposits, having been placed by the receiving officer to the credit of that department instead of this, | | 228 69 |
| The balance due by the department on the 1st July, 1832, as above stated, | | 2,844 67 |
| And the department was indebted on the first of July, 1833, beyond the amount of available balances due to it, in the sum of | | $195,208 40 |
| The annual expense of transporting the mail under existing contracts, with all their improvements, is | | $2,033,289 42 |
| The incidental expenses of the department, estimated at | | 90,000 00 |
| Making the aggregate expense for a year | | $2,123,298 42 |
| The net proceeds of postages for the year ending the 30th June, 1833, amounted to— | $1,790,254 65 | |
| The net increase for that year over the preceding year, and which may be safely estimated as continuing, was | 247,156 16 | |
| Making the net revenue for the current year, | | $2,037,410 81 |
| Leaving a deficit of | | $85,878 61 |

The former method of keeping the accounts of the expenses of transportation would have left out of this report expenses for transportation, as if they had not been incurred, because not entered under their proper dates, the sum of $91,658 82, viz:

| | | |
|---|---|---|
| For services performed prior to July 1,1 832, | | $22,294 44 |
| For services performed during the 3d quarter, 1832, | | 9,420 50 |
| " " 4th quarter, 1832, | | 9,932 21 |
| " " 1st " 1833, | | 22,872 70 |
| " " 2d " 1833, | | 27,138 97 |
| Making together, | | $91,658 82 |

This, had the imperfection of that system remained unobserved, would have made the Department appear to be less indebted, by that amount, than what it is in reality.

The discovery of the excess of expenditures beyond its revenues, at once showed the necessity of retrenchment. The only practicable means of doing this, was the withdrawal of some of the improvements which had been made, and on such routs as would be least injurious to the public, and least prejudicial to the revenues of the Department.

| | |
|---|---|
| This has been done with great care and attention to these two points. The reductions have been directed on the transportation to take effect from the 1st of January next, to the annual amount of | $202,370 |
| The contracts have been renewed for the south western section, comprising the States of Louisiana, Mississippi, Alabama, Tennessee, Missouri, Illinois and Indiana, and the Territory of Arkansas, with a greater amount of improvements than curtails at an annual saving of | 71,893 |
| Making together an annual retrenchment in the expenses of the Department, of | $274,263 |

In making these retrenchments, many of the principal contractors who were to be affected by them, seeing the necessity which induced the measure, have readily declared their cordial acquiescence in it; and, with a patriotic spirit becoming their character, have shown a determination to sustain the Department, as a paramount object, at any sacrifices which it may require on their part.

After the reductions shall take effect, the annual transportation of the mail will still be 25,527,957 miles, viz:

| | In stages. | In steam boats. | On horseback and in sulkies. | Total. |

| Aggregate, | 25,527,957 | |

Thus it will appear, that but a part of the improvements will be withdrawn, to enable the Department still to rely exclusively on its own resources, as the annual transportation will still be, after the 1st January next, 1,902,936 miles more than it was on the 1st July, 1833.

I have the honor to be,
Very respectfully,
Your obedient servant,
W. T. BARRY.

*Empress of Russia*—One of the first dancers in Europe is said to be the wife and illustrious consort of the great Autocrat of the North, who is devotedly fond of the recreation as to join in the dance every night throughout the year, either with the select members of the household, or at the state balls of the Imperial Court. Her Majesty was the Princess Royal of Russia, for whom was invented the popular pas of the galoppe, a dance now interdicted to the Empress by the physicians of St. Petersburgh.

## FAIRBANK'S PLATFORM SCALES.

THESE scales are constructed upon an improved principle; are fitted up with great care by the manufacturers, and warranted to weigh with accuracy from half a pound to 12,000. Being placed in, and forming part of, the floor, the process of weighing is performed with ease and facility, while the space they occupy may be improved as a passage way or for other purposes.

The construction of these scales is such that they are little liable to derangement of wear, and their perfect operation will be guaranteed for any reasonable length of time.

The usual objection, that a new method of weighing cannot be safely entrusted to unskilful hands, is obviated by the use of the improved BALANCE, concerning which are the following remarks in the Journal of the Franklin Institute, of the state of Pennsylvania, for the promotion of the Mechanic Arts, for June, 1833. (Edited by Thos. P. Jones, M. D., late Superintendent of the Patent Office, at Washington, Professor of Mechanics in the Franklin Institute, &c.

"The Messrs. Fairbanks, some time since, obtained a patent for a Platform Weighing Machine, and this mode of adjuating and graduating the Beam of the Balance, and the weights, was devised by them with a view to its employment with the before mentioned machine. We have had an opportunity of examining one of their balances, and have been much pleased with it: this examination, however, was not necessary to the conviction that it possesses a just claim to the character of a real improvement, the whole arrangement being so simple as to enable any person to perceive that it is well adapted to the purpose contemplated, that of facilitating the business of weighing, and more especially of heavy articles."

The subscriber, as Agent, will receive orders for the above Scales, which will be made in this city to order. They can be seen at his Warehouse, No. 84, Front street.

## SALE OF REAL ESTATE.

THE Subscribers, Trustees of the New Philadelphia Society, at Phillipsburgh, Beaver county, Pennsylvania, offer for sale the following property, to wit:

| | | | |
|---|---|---|---|
| 1 | tract of land | containing | 330 acres |
| 1 | do | do | 330 |
| 1 | do | do | 67 |
| 1 | do | do | 7 |
| 1 | do | do | 40 |
| | other lots, containing about | | 6 |

The above lands lie in one body, fronting about two miles upon the Ohio river—immediately opposite the mouth of Big Beaver creek, and the Beaver Division of the Pennsylvania Canal. The land is rich, and a part of it under a high state of cultivation—its location pleasant and healthy. The improvements upon the same are valuable, including the town of Phillipsburgh, late the residence of Count Leon, and the New Philadelphia Society. The town contains about 40 Dwelling Houses, now in order; some of them brick houses and two stories high. A large and spacious Hotel, a Store house, Church, a number of Shops, for mechanics, Stables, Barns, and other out houses. Also, two large new buildings, lately erected, but not yet finished, one of brick, the other of frame (the latter suitable for a manufactory) a very extensive public garden, and also fruit trees of various kinds. The property has also attached to it the right of a ferry across the Ohio, which is valuable, and becoming more so every day.

The above property is situated in the midst of a wealthy and prosperous country, distant about 28 miles below Pittsburgh, and one mile from Beaver, the seat of justice for Beaver county—and having a view for many miles up and down the Ohio, and of the country to a great distance around.

The subscribers are confident in saying that few situations could be found, presenting greater facilities to the farmer, mechanic, the manufacturer, and others—a soil rich and productive—the neighborhood abounding in coal—well timbered and watered, and, by means of the Pennsylvania Canal, and steamboat navigation, a cheap and ready conveyance to market, and a communication with other places is ensured.

The property is susceptible of divisions into farms, or for the location of new towns, or for the extension of the present one.

Should it not be sold on or before the first day of January next, it will then be offered at public sale, upon the premises, to the highest and best bidder.

It will be sold in a body, or in parcels, to suit purchasers.

Terms of sale will be reasonable.

Information can be had by enquiring of the subscribers, two of whom live in the neighborhood, and one on the premises.

DOCTOR ROBERT'S
☞*WELCH MEDICAMENTUM.*☜

FOR the cure of Dyspepsia, Liver Complaints. Jaundice, Cholic, Fever and Ague, Dysentery, Headach, Loss of Appetite, Flatulence, Hypochondria, Hysterics, Dropsical Complaints, and Heartburn, It also prevents all Bilious disorders, and removes habitual Costiveness, Asthma, Strangury, Gravel, Rheumatism, Gout, and Impurities of the Blood.

A person who uses this Medicamentum will not require the use of the lancet, or any means of the healing art. It restores and revives the animal spirits, invigorates the system, removes nervous tremors, obtunds rheumatic and anthritic pains, and prevents their return. It cleanses the stomach of all morbid humors, which cause indigestion, acidities, headach, and lowness of spirits; cures all bilious disorders, and all cholics of the stomach and bowels, almost immediately; inspires cheerfulness; gives comfort to the dropsical; takes away palpitation of the heart; gives circulation to the blood; restores bloom to the sallow or sickly cheek, and plumpness to the meagre habit; purges without pain, and banishes all cause of fever of every kind. It acts on the stomach, that great reservoir of the human system, a diseased state of which causes all diseases. No alteration in the usual habits of life is required, but the abstaining from distilled ardent spirits.

CERTIFICATE,
From Rev. Derick Lansing, D. D., Pastor of the Second Presbyterian Church in Utica.

UTICA, Jan. 6, 1830.

*To Dr. Hitchcock.*—Dear Sir: I have always been one of the number of those who have placed little confidence in *nostrums* or *specifics,* and for this reason, although I saw your advertisement of the Welch Medicamentum, I could not bring my mind to consent to use it. My sufferings, from indigestion, during the past summer, were so severe, as materially to affect my comfort, and my capacity for usefulness. I have reason to thank you, sir, that, on hearing of the state of my health, you kindly sent me your Medicamentum. I have taken it faithfully, and with entire success. I have not been visited with one of those turns of distress, which before were weekly periodical, since I began to take your valuable medicine. Could I receive the same relief which I have hitherto experienced, on condition of taking it for life, I should cheerfully comply with such condition. Your's, very truly, D. C. LANSING.

*ANTI-DYSPEPTIC ELIXER.*

ONE of the most agreeable and efficacious Medicines ever discovered for the permanent cure of those chronic states of derangement of the stomach, constituting that miserable disease called Dyspepsia.

The basis of this Elixer s vegetables, and perfectly innocent in its operation; it destroys that sour state of the stomach, the instant it is taken, and stops the morbid secretion, by giving strength to the muscular fibre of that important organ, by which means the peristaltic motion of the intestines is increased, and the costiveness obviated; a new action is given to the system, which puts an end to a train of distressing nervous sensations.

Another form of the disease in which the Elixer is admirably calculated to relieve, is the decline of fever, where the stomach will not bear the ordinary strengthening medicines indicated in such cases, it has the surprising effect of giving vigor, and restoring the natural secretions of the body, without increasing the febrile state. Not the least danger is to be apprehended from exposure to cold, while under the use of this medicine, nor will it interrupt necessary employment of the patient a single hour.

☞A number of cases of cures performed by the Anti-Dyspeptic Elixer in the vicinity of Pittsburgh can be given.

**GEO. W. CARPENTER'S**
COMPOUND SYRUP OF LIVERWORT,

A SAFE and Valuable Medicine for Coughs, Spitting of Blood, Consumption, and Liver Complaints.

Most of the medicines made use of for the above diseases are of a stimulating nature, composed generally of Resins and Balsams, in alcoholic solutions, which, although sometimes giving t emporary relief, in almost every instance where they are freely used, aggravate the disease, and reduce the strength of the patient.

This article possesses superior advantages over these preparations, its action being of a tonic, invigorating and strengthening nature, thus overcoming the disease by promoting expectoration, and gradully increasing the strength of the patient, and thus, without being attended with any unpleasant effects: it also agrees with the stomach, in a cases, and is a pleasant medicine to take.

## TYPE FOUNDRY.

HAVING purchased of Mr. Richard Ronaldson, his long established and very extensive Type Foundry, the subscribers have formed a co-partnership for the purpose of continuing said business, and for the convenience of their friends and patrons, have removed their establishment to a more central part of the city. As it is their intention to keep on hand a good assortment of the best type, and to make such additions and improvements as the taste of the trade and the wants of the country require, they flatter themselves that this establishment will merit a large share of patronage. They have now several founts on hand, which can be furnished at a few hours' notice, and are prepared to make founts of all weights and sizes, from Pearl to 22 lines Pica, including a variety of Ornamental Letter. Their assortment of Cuts, Dashes, Brass Rule, and other Ornaments, will be found to be very extensive, of which specimens will be forwarded to Printers as soon as they can be prepared.

Printing Presses of every description, Printing Ink of the most approved qualities, Composing Sticks, Brass and Common Galleys, Chases, Imposing Stones, Cases, Paper and Press Boards, Standing Presses, Furniture, together with a complete assortment of all articles used in a Printing Office, will be kept constantly on hand.

Small founts, suitable for Book Binders, in great variety, may be had when called for.

Orders from all parts in the Union will be promptly and most carefully attended to, and particularly in supplying *sorts* for all founts furnished by their predecessors, Binny & Ronaldson, and Richard Ronaldson.

PATENT PLANING MACHINE.—The right to use this valuable machine, invented and patented by William Woodworth, and known as Woodworth's Patent Planing Machine, may be obtained on application to the subscriber for the counties of Allegheny, Butler, Beaver, Washington, Green, Fayette, Somerset, Cambria, Indiana, Jefferson, Clearfield, M'Kean, Warren, Venango, Mercer, Crawford, and Erie, in the State of Pennsylvania. That part of Maryland lying west of the Blue Ridge; all that part of Virginia lying west of the Blue Ridge, except the county of Ohio. The whole of the state of Ohio except the counties of Hamilton, Butler, and Montgomery. The whole of the state of Kentucky, except the counties of Jefferson, Boone, Oldham, Gallatin, and Campbell. The whole of Indiana, except the counties of Floyd, Clark, Jefferson, Dearborn, and Switzerland. The whole of the state of Illinois, and the territory of Michigan. Rights to use the machine in that part of the United States, named above, will be sold by the single county or in larger districts. As it is presumed that no one will purchase without seeing the machine at work, a description of it is deemed unnecessary. Should any person, however, wish to purchase, and find it inconvenient to visit the places where it is in operation, a machine will be furnished, warranted to plane, tongue and groove, and bring to an exact width and thickness, a white pine board of 12 feet long, and of any width from 1 to 14 inches, in one minute and ten seconds, or an oak board of the same dimensions in 2 minutes and 10 seconds. Machines may be seen at work in the cities of New Orleans, Washington, Philadelphia, New York, Boston, and others at the south and east, at Wheeling, Virginia, and at the saw mill of Messrs. Irwin & Herron, in this city.

Persons desiring to purchase will have the certificates of scientific and practical men who have seen it at work, in the different places in which it has been put up, forwarded to them. They give their opinion as to the great value of the invention, state the time they have seen boards dressed by this machine, and describe the quality of the work as compared with that performed by hand labor.
